depends on Hyalun<sup>®</sup>  
Shouldn't you?

**Equine  
Joint Health Management  
at it's Finest!**

"I have noticed a drastic change in my horses since using Hyalun, this product is definitely a must have in my training program. My horses improved their performance and my customers are saving money on expensive alternatives"

**Andrea Fappani**  
NRHA Million Dollar Rider

*The Choice of Champions*

U.S. PATENT NO. 6,607,745

# High Molecular Weight Hyalun<sup>®</sup>

## All Natural and Highly Needed

All horses are susceptible to joint issues. Just as we change the oil in our car to improve performance, using Hyalun<sup>®</sup> can help maintain proper levels of synovial fluid viscosities for joint lubrication.

## Hyaluronic Acid becomes the Solution of Choice

Unfortunately most owners are reactive with the joint health of their horses instead of proactive. They wait until they see issues and then endure a lengthy and costly diagnosis with their vet. But now, more and more proactive owners give their horses Hyaluronic Acid (HA) to help them continually support and maintain joint health and flexibility.

## Hyalun<sup>®</sup> is the preferred professional pick

No one is pickier about their horse's performance than the professionals. Consistently comparing using Hyalun<sup>®</sup> in their young horses to changing the oil in their car at regular intervals, professional riders like Sherry Cervi, Bob Avila, Andrea Fappani, J.R. Reichert and Matt Gaines believe Hyalun<sup>®</sup> is the preventative measure to avoid future joint issues.

## Hyalun<sup>®</sup> is pure high molecular weight HA

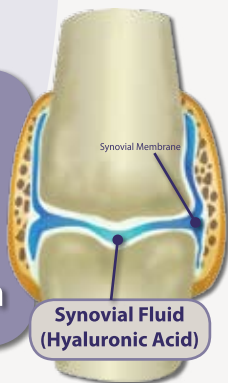

Bio-identical to the type that nature uses to keep joints healthy. High molecular weight HA helps maintain optimum levels of viscosity in the joint fluid providing proper lubrication and flexibility for maximum performance. Many HA products are made from animal sources, but Hyalun<sup>®</sup> is made from a natural fermentation process. There is a substantial difference in the effectiveness of HA products, so stick with Hyalun<sup>®</sup> for great results.

**Experience the Hyalun<sup>®</sup> difference and keep your horses joints in peak condition.**

## Benefits of Hyalun<sup>®</sup>

*Helps support and maintain*

- joint mobility
- joint flexibility
- joint and cartilage function

# Hyalun<sup>®</sup> 90

*Just pull the trigger for a daily amount! Achieve the joint health benefits of HA and help keep your horses joints in peak condition with this 90 day supply.*

Hyalun<sup>®</sup> 90 is an economical and convenient system that is super easy to administer with the built in equine dispensing tip. A simple pull of the trigger delivers a calibrated amount. Perfect for multiple horse owners or large stables!

**MSRP \$99.95**

**Sherry Cervi- lifetime earnings of over 1.4 million chooses Hyalun<sup>®</sup> to keep her horses in the money.**

A photograph of Sherry Cervi, a professional rodeo rider, wearing a black cowboy hat and a black jacket, riding a dark horse in a rodeo arena. The arena has a dirt floor and a crowd of spectators in the background. A blue banner with 'LAS VEGAS' and a yellow banner with 'Wrangler' are visible. A large orange number '50' is also visible in the background.

I give Hyalun, a 100% pure Hyaluronic acid supplement. I choose it because Hyaluronic acid is found naturally in the joint and Hyalun<sup>®</sup> helps keep the amount of HA in the joint normal. It is the only joint supplement I give and I can really tell it helps maintain my horse's joint health over time-

***Sherry Cervi***

# Hyalun<sup>®</sup> 30

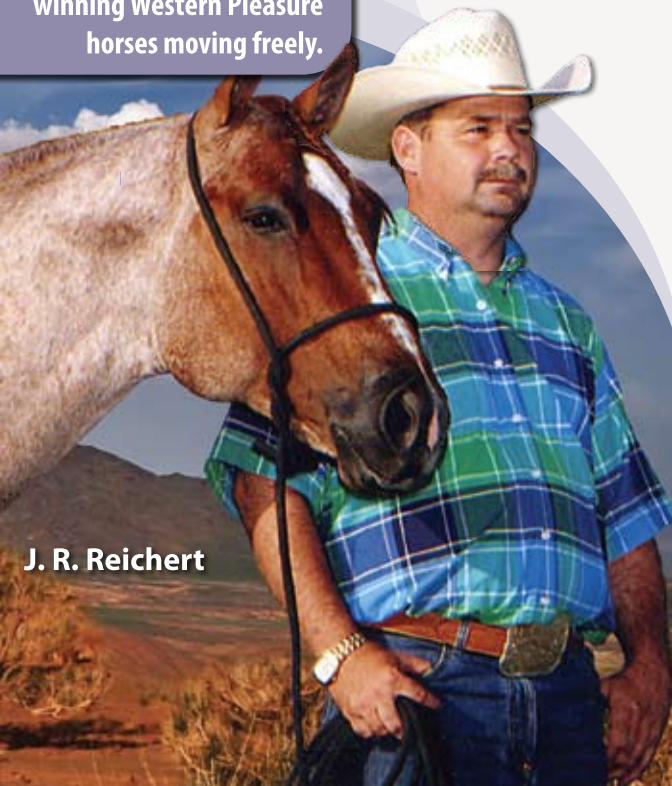

*Our original 30 day supply.  
Just use one dropper full  
per day to support joint  
and cartilage function.  
An economical way to  
help your horse maintain  
proper joint mobility.*

Hyalun<sup>®</sup> 30 is our original product which became the standard for oral HA supplementation. A smart, economical way to experience the difference that high molecular weight Hyalun<sup>®</sup> can make in your horse! Take the Hyalun<sup>®</sup> challenge and see why it is the Choice of Champions!

**MSRP \$39.95**

**J.R. Reichert counts on  
Hyalun<sup>®</sup> to keep his award-  
winning Western Pleasure  
horses moving freely.**

**J. R. Reichert**

# Hyalun<sup>®</sup> Gel

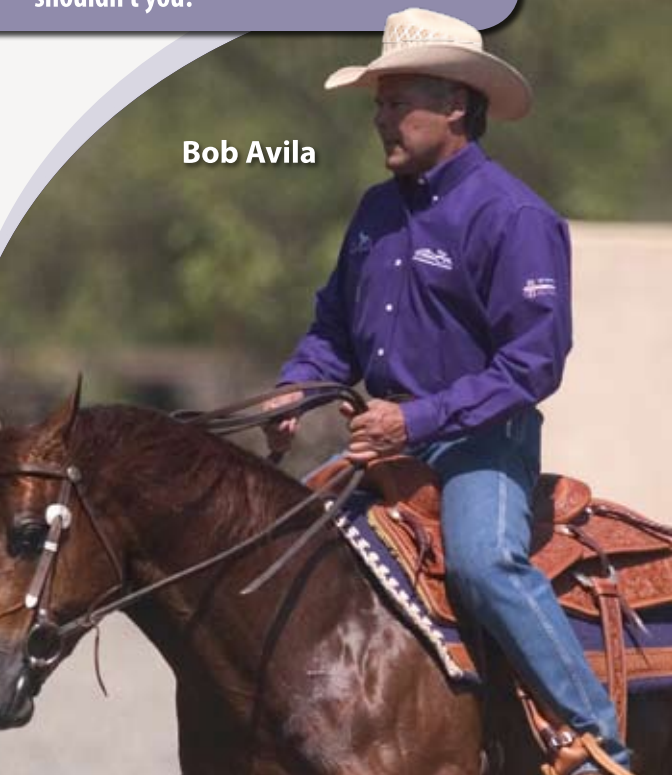

*Give your oral HA program a jump start with this concentrated HA Gel! A great choice for pre or post event or initial loading amounts!*

Hyalun<sup>®</sup> Gel is super concentrated and designed as a pre or post event form. High molecular weight HA in the highest concentration available is an incredible way to experience the Hyalun<sup>®</sup> difference. No low molecular weight animal sourced HA can match the effectiveness of pure high molecular weight Hyalun<sup>®</sup>!

**MSRP \$29.95**

People like Bob Avila, who depend on their horse's performance choose Hyalun<sup>®</sup> - shouldn't you?

U.S. Patent No. 5,888,984

# Hyalun<sup>®</sup> Rub

with **HYALURONIC ACID**  
**EMU OIL CMO**

- *Soothes & moisturizes*
- *Fast absorbing*
- *Non-Greasy*
- *Easy to Apply*
- *Pleasant smelling*

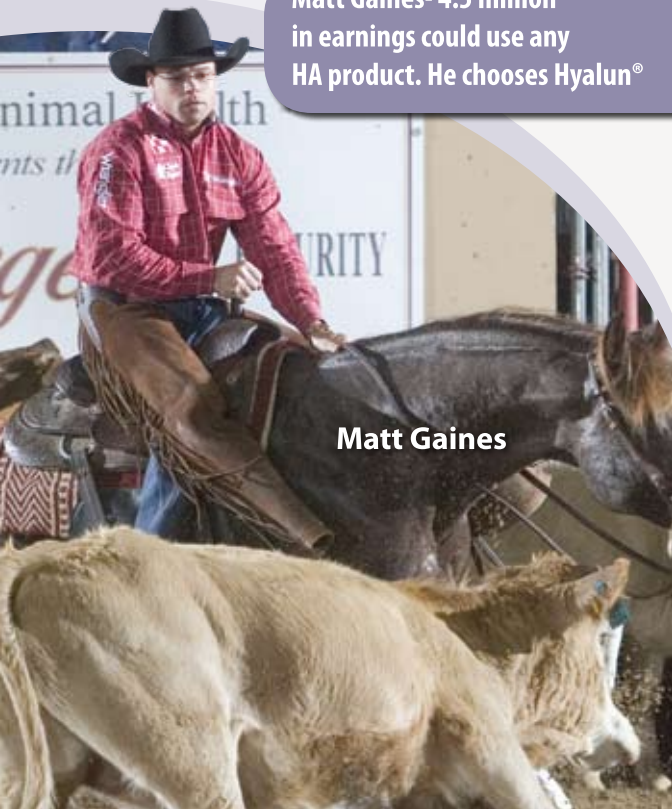

A pleasant smelling cream which uses patented ingredients to help soothe, moisturize and maintain healthy equine joints and muscles. Hyaluronic Acid(HA) and Cetyl Myristoleate(CMO) for their ability to lubricate joints and Emu Oil to help penetrate deep into the skin tissue. We also added L-Arginine and Capsaicin and then we put it all in a unique natural preservative base so there are no harmful parabens.

Try our Hyalun<sup>®</sup> Rub and you won't want to be without it again! Simply apply as needed to soothe joints and muscles and your horse will thank you! Great for riders too!

**MSRP \$29.95**

**Matt Gaines- 4.5 million  
in earnings could use any  
HA product. He chooses Hyalun<sup>®</sup>**

**Matt Gaines**

# Hyalun<sup>®</sup> Testimonials

*"It is the easiest and most effective product I have found on the market today, and I know my horse, Diamond Daisey, has found support in the joints. One month's time has seen super results on our horse with known joint issues, and we have since started all our horses on the product as maintenance regiment!"*

**--Jay Miller**

*"As a veterinarian, as well as a professional horseman, I am reluctant to endorse just any product line due to my professional obligations. However, after having extensive experience with Hyalun (Oral Hyalun) I have observed an obvious benefit from its use in problem horses. I am currently using Hyalun on my young horses as well"*

**--Steve Schwartzberger, DVM, Scharzenberger Training**

*"Hyalun" -- a word near and dear to my heart! Almost two years ago, shortly after my now-four-year-old gelding I Make Em Shake went into race training, I saw an advertisement for Hyalun. After reading the available literature, I sent for the product, and my race trainer began using it. Without going into all the details, this horse ran eight races (all trials and finals) his two-year-old year and 11 races last year (again allowance, trials, and finals). To date he has earned 256 racing points (Superior Race Horse in September 2004), TQHA Champion 2-Year-Old Gelding, AQHA Texas High-Point 3-Year-Old Gelding, and AQHA Regional High-Point 3-Year-Old Gelding. He has also earned nearly \$315,000 on the track. He has NEVER chipped or shin bucked. My vet has X-rayed him extensively at the end of his two racing years -- 24 pictures in 2003 and 20 in 2004. He just stands and shakes his head and finally says, "This is how the textbooks say a horse's joints SHOULD look." Do I believe in Hyalun? You bet I do, every day that I look at my horse and every time I see the many beautiful awards he has earned.*

**--Betty Jo Spence**

**NOW FOR PETS!**

**Now your pets can also benefit from oral HA with new HyaFlex<sup>™</sup>. Lindsey Hinds depends on HyaFlex<sup>™</sup> oral hyaluronic acid to keep Neo and Cappucino performing in top shape!**

**MSRP \$29.95**

*proudly made  
in the USA*
